Florida SHOTS User Responsibility

Help Keep the System Protected and Secure

Florida SHOTS is located on a secure server with password-restricted access. We use the latest encryption, firewall safeguards, and the confidential information is only available to authorized professionals via a password-protected login.

Each organization enrolled with Florida SHOTS has at least one user designated as a Local Organization Administrator (LOA) to manage their account and ensure security. Some of the important responsibilities of LOAs are:

- Granting access to new users
- Unlocking accounts for users who are locked out
- Terminating system access for employees who leave your organization
- Reviewing and maintaining the Personnel List regularly

To learn more about these responsibilities see our Quick Tips guide and our training video. You can find these and more on our website at:
https://flshotsusers.com/training.

Important Reminder: Remember that all users **must have their own individual login information,** and this is not to be shared with anyone. Florida SHOTS contains confidential patient information, and we thank all our users for your commitment to protecting the confidentiality and security of the system!

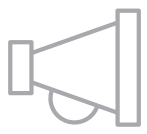

You Said It

It's always nice to know what others who are enrolled in Florida SHOTS have to say about the program. In each issue, we share what some of our users think about the system. This interview features Susan Churchill, MSN, RN, Clinical Care Coordinator at Nicklaus Children's Pediatric Specialists Pediatric Care Center.

Left to right: **Alena Arboleda, MA, Jamayrlla Barrios-Lopez, MA, Diane (Deedee) Lichtman, RN, Susan Churchill, RN, Christopher Soto, RN, Yvette Perez, RN, and Maria Zelaya, MA.**

What do you think is the best feature of the Florida SHOTS for your office?

The training that is offered on the Florida SHOTS website is very informative and helpful, especially for new hires to the clinic. The ability to create Reminder/Recall reports within the system assists us in being able to reach out to patients and families who are due or overdue for vaccines.

What do you think is the best feature of Florida SHOTS for patients?

The accessibility of their child's record throughout the state provides for continuity of the record if the family relocates within the state of Florida.

How have you implemented Florida SHOTS into your workflow?

Each morning the nursing staff reviews our patient list and verifies their Florida SHOTS record against the patient's electronic chart. Any discrepancies are noted, and the records are updated prior to the end of the patient's visit. The ability to import vaccines from Florida SHOTS directly into our patient's electronic health record is a great feature. Also, the ability to create new records and add historical vaccines to the patient's record ensures an up-to-date document.

If another doctor's office were to call and ask you why they should enroll, what would you say?

Florida SHOTS is an excellent tool for vaccine management! The help desk is always there to assist and is an added bonus when you enroll.

We're Here for You! For more information about how you can participate, please call the Florida SHOTS enrollment desk at **(877) 888-SHOT**.

Data Upload Spotlight

Don't Forget to Check Your Codes!

Did you know that having incorrect or outdated CVX, MVX and VIS codes in your EHR's immunization table can result in vaccine messages getting rejected and not transferring to patient records? Make sure to regularly review and update to ensure you have the correct codes. See here for important links:

1. **CVX code table:** Immunization codes sent by your EMR to FLSHOTS.

2. **MVX code table:** Vaccine manufacturers table.

3. **Vaccine Information Statements (VIS) dates:** These are the most up-to-date CDC patient vaccine information forms.

To learn more data upload tips, visit **flshotsusers.com/training/live-training** and sign up for the "Data Quality Report" training offered the third Wednesday of every month.

Upload Tip: Patient ethnicity, as well as other data elements, are reporting requirments per the Department of Health, Emergency Rule 64DER20-43.

Did You Know?

Florida SHOTS is currently working on a new initiative with birthing hospitals across the state to match Vital Statistics records for newborn babies and their first dose of hepatitis B vaccine that is uploaded from the hospital. In the past there were challenges around this, and we've worked hard to update our system to match this data. If you are a hospital who would like to work with us or you have questions, please contact Diane McLeod at 813.270.9785 or Diane.McLeod@FLhealth.gov.

Tech Tips

"I haven't logged into my Florida SHOTS account in a while and now my credentials are not working. How can I get back in the system?"

If you have not accessed the system and your account becomes inactivated, please contact your Local Organization Administrator (LOA) for assistance. If you are unsure who your LOA is, you can contact our Helpdesk at (877) 888-SHOT.

Participating Software Providers

These software companies have created data exchange capabilities between Florida SHOTS and their EMR, practice management, or billing software. For a definition of capabilities by certification level, see "Participating Software Companies" at **www.flshotsusers.com/data-exchange/certified-software-providers**

529 MILLION+ SHOT RECORDS

As of February 1, 2023, we've processed more than 529 million shot records via data upload from over 15,000 participating healthcare providers and multiple insurance organizations. There are also 2,993 real-time live web service healthcare provider connections through 145 EHRs.

Interested in learning more about how your EHR software could be set up to upload shot data to Florida SHOTS? Check out page 3 of this issue to see which software companies are currently participating, or visit www.flshotsusers.com for current data upload information.

ACCURACY COUNTS

Keep your data
on the right track ✓

Using incorrect or outdated CVX codes in your immunization records can lead to rejected uploads. Reference the Vaccine Information Table to make sure your codes are current, including all COVID-19 vaccines. You can find the table posted with the Florida SHOTS training guides. Bookmark or download the table today!

FACT: A search dog can identify the right scent 90% of the time.
